Preface

Martin Luther King, Jr. must be considered one of the most important civil rights leaders of our time. There is no way of mentioning the civil rights movement without referring to him. Moreover, he was recognized as a renowned minister and scholar. Dr. King left an abundance of speeches, sermons, books, articles, and interviews.

His main purpose in life was to acquire equal rights for all people. He evoked praise and criticism from blacks and whites. Some contended that his philosophy inspired violence and disrespect for the law, while others believed that his ideology was too passive to bring about any significant changes in our society.

King preached a philosophy of nonviolence and civil disobedience, which led to numerous marches, rallies, and demonstrations. His actions were greatly responsible for ending many voting irregularities in the South, improving fair housing conditions, abolishing segregated public facilities, and the passage of the Civil Rights Acts.

Since his death, numerous commemorations and celebrations have been held in his honor. His life has inspired movies, the naming of streets, and buildings in his honor, and finally, a national holiday for his deeds in the field of civil and human rights. Dr. King will go down in American history as one of the most intriguing persons of the twentieth century.

The material presented in this work updates the 1977 work by William H. Fisher, Free At Last: A Bibliography of Martin Luther King, Jr. (Scarecrow Press). The present volume provides broader coverage of biographical sources and extensive references to remarks in the Congressional Record.

A major feature is the citations of declassified documents compiled by the Federal Bureau of Investigation (FBI) that detail surveillance on Dr. King from 1962 until the time of his death. These documents allow the researcher to examine King and his involvement with the civil rights movement. Many of these documents were secured illegally through the use of wiretaps and microphones that were secretly hidden in King's hotel rooms.

Many of these documents were considered too sensitive by the Justice Department and were placed in the National Archives until the year 2027. The remainder of these documents are housed at the FBI reading room in Washington, D. C. and are available on microfilm (Garrow, David J. ed. The Martin Luther King, Jr. FBI File. Frederick, MD: University Publications of America. 16 microfilm reels with printed guide.)

Through the use of computer literature searches, I was able to

generate a large array of material by and about Dr. King; a total of almost thirteen hundred items were published over the thirty-year period, from 1955 to 1984. Included are close to 190 citations of works by King, many reprinted since his death in 1968, and some ninety biographical references.

Chapter 1 contains numerous references of books, articles, speeches, sermons, and interviews by King.

Chapter 2 includes material that covers the life of King from his early childhood to his death. Some entries are brief while others are quite in-depth.

Chapter 3 focuses on the activities and functions of the Southern Christian Leadership Conference and King's involvement with this organization.

Chapter 4 pertains to the numerous rallies, marches, and demonstrations that King participated in during his career as a civil rights leader. Reactions to these demonstrations by public and government officials are also included.

Chapter 5 includes information relating to reactions from various people on his being awarded the Nobel Prize and the several other awards he received during his lifetime.

Chapter 6 deals with government representatives who sought to discredit King as a civil rights leader. A large amount of the material in this chapter covers the FBI's attempt to discredit and harass King through the use of wiretaps, informants, and other tactics.

Chapter 7 contains material that seeks to critique and interpret some of the basic thoughts of King on various subjects.

Chapter 8 includes information that studies the circumstances involving the death of King, the effect his death had on various groups and on society as a whole, the several previous threats and attempts on his life, the assassin himself, and the notion that a conspiracy against King existed.

Chapter 9 contains materials on the numerous eulogies, tributes, memorials, and commemorations given in honor of King.

Author and subject indexes and a title index to King's own works complete the volume.

Each of the nine chapters is subdivided into sections listing books, articles, dissertations, and government documents, except for chapter 1, which follows a chronological sequence. Newspaper articles and foreign publications are omitted. An asterisk (*) identifies sources written for a juvenile audience.

Brief annotations are provided to assist the user in making selections. Some citations appear without annotations if the source was not personally examined or if the title is self-explanatory. Page references are provided for encyclopedic and dictionary-type works.

Many thanks to Herb Nath, Pearl Erickson, Barbara Secrest, and Gail Tolbert for their assistance with this work. I am especially indebted to the Citadel Development Foundation for making this project possible. Though many people assisted and encouraged me in this endeavor, I take full responsibility for any omissions or errors that appear in this bibliography.

It is my hope that this bibliography will serve as a valuable resource for those who study and appreciate the career and deeds of Dr. Martin Luther King, Jr., a scholar and a leader of the civil rights movement.
