TV'S BIG GAME HUNTERS

BY MAX MISHUGINNAH

If you're in the habit of watching idiotic TV "Game Shows," then the names Mark Goodman and Bill Todson are familiar to you. Together, these clever and original TV producers have the whole field sewn up and are still out hunting bigger and better games. Their approach is to find a gimmick that appeals to children as well as adults—and the simpler, the better. For the coming season, they plan a whole new array of simple games for simple minds. What they've done is to combine real kid games with clever twists designed to interest adults. Some of these new "Game Shows" are: • PONY EXPRESS — which is just like the old-fashioned "Post Office," only with a little more horsing around. • HIDE-AND-SEEK — in which the panel guests hide somewhere in the studio, and the audience has to find them. • STEAL THE OLD MAN'S BUNDLE — a new quiz game with the Gabor Sisters and Mama, who ask questions of a masked business tycoon. Object of game is to guess his identity and net worth . . . and marry him before buzzer sounds. • SALUGGI—where a personal article of a guest star is thrown around by the studio audience till he can catch it. Then the audience throws the star around till the M.C. can catch him. • TIDDLY WINKS — a variation of the old

game, played with hot pizzas • and HOP SCOTCH — played with real Scotch.

Their newest venture, however, is a show called SWITCH THAT DIAL — in which the viewing audience all around the country takes part. At a signal, two viewers at home rush to see who can turn off the set first. The loser is then required to watch the rest of the show . . . a "Gale Storm" re-run.

All in all, television awaits the day when a new "Give-away" show hits the airwaves, and Goodman-Todson are given away.

"HOP SCOTCH"—played with real Scotch, one of the new Goodman-Todson TV games. ➔

INSIDE WANDA FURD

PIECE WORK

BY VIVI SECTION

Wanda Furd has appeared on TV in many parts . . . because many parts of Wanda Furd have appeared on TV. It all started 8 years ago when Wanda's gall bladder starred in the premiere showing of "Medic." Some of the most important TV producers were there for the opening.

It wasn't long before her liver turned up on a "Young Doctor Malone" show. Two weeks later, her varicose veins popped up on "Dr. Hudson's Journal." Since then, whenever a TV doctor show needed a vital organ, the call went out for Wanda Furd.

Fans of TV medical dramas will remember her kidney when it appeared on the first "Dr. Kildare" episode. Recently, her burst appendix won rave reviews on "The Nurses." From there, her pancreas went on to score in a "Ben Casey" opus. One producer wants to do a whole series built around her lower intestines.

Dissatisfied with this piece-work career, however, Wanda looks forward to the day when the whole of her will be given a chance to act. But she is forever being type-cast. Every day, offers pour in for her lungs, stomach, even her sinus cavities. A sensitive girl, she was once offered a part in a Hollywood film, "The Young Doctors"—but turned it down when she learned it was just her clavicle they were interested in, not her.

Wanda's fame is widespread. She claims that when she opens her mouth in restaurants, people recognize her tonsils.

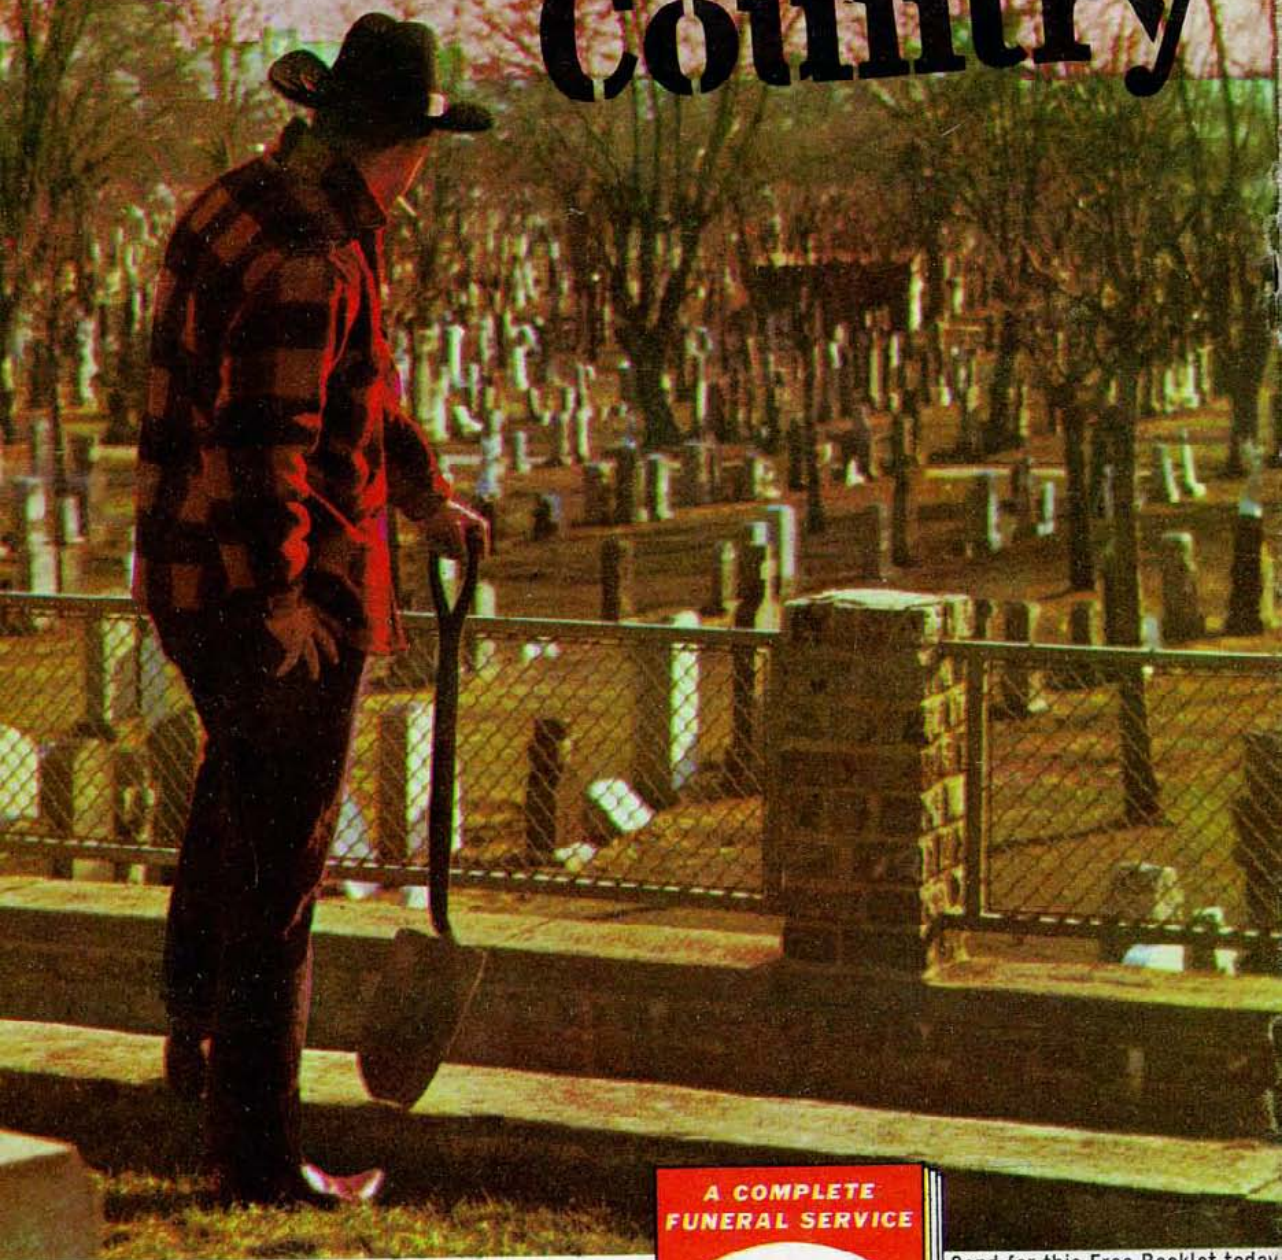

Now, with medical shows in such great demand, Wanda Furd has been hard at work developing a new addition to her many talents . . . a lulu of an ulcer!
